

## **Larimer County**

### **Masonville District**

The Masonville District lies west of the town of Masonville in Larimer County (Dunn, 2003). According to Vanderwilt (1947) the district produced some gold and silver ore from 1935 to 1943, totaling 93 ounces of gold and 83 ounces of silver.

The district apparently lies in Precambrian rocks bounded by faults adjacent to Paleozoic sediments (Braddock, et al, 1970).
