Composite Geologic Map of the Raton Basin In Colorado

Geologic Units and Features

Sedimentary Units
- Tpc: Tertiary and Quaternary sediments
- TKr: Cretaceous sediments
- TcTh: Triassic and Cretaceous sediments
- Kt: Paleozoic sediments

Intrusive Units
- Kv: Granite
- Kp: Diorite
- Qp: Rhyolite
- Ql: Andesite
- Qal: Felsic tuff

Contact Metamorphic Units
- Teb: Metamorphic rocks
- Tis: Metamorphic schist
- Tii: Metamorphic gneiss
- Tib: Metamorphic mafic rocks
- Tmi: Metamorphic quartzite

Metamorphic and Igneous Complex
- TKm: Metamorphic rocks

Pediment Deposits
- Alluvium
- Huerfano Formation
- Cuchara Formation
- Poison Canyon Formation

Mafic Lava Flows
- Mafic Lava Flows

Granitic Stocks, Sole Injection, Plugs, Dikes
- Intermediate Stocks, Laccoliths, Plugs, Dikes
- Mafic Plugs, Dikes, Sills

Metamorphic and Igneous Complex
- Quartzite, Slate, and Slightly Altered Sandstone
