

Gunnison County

Kezar Basin District

Henderson (1926) and Dunn (2003) list the Kezar Basin District as occupying four sections in southern Gunnison County near the Blue Mesa Reservoir (sections 4, 5, 8, and 9 of T49N, R2W). This area appears to be very close to what Streufert (1999) calls the "White Earth Tungsten Area." No details are available except that Streufert describes scheelite at the Lily Belle Mine.
