## JEFFERSON COUNTY

## JEFFERSON COUNTY

uranium/ ash/ trace elements/ mineralogy/ petrology/  
geochemistry/ Colorado/ Texas/ North Dakota/  
South Dakota/ analyses/

Downs, G. R., and Bird, A. G., 1965

Jefferson County/ Schwartzwalder mine/ ore deposits/  
genesis/ production/ reserves/ pitchblende/  
veins/ Igneous-metamorphic/ Front Range/

Erickson, R. L., Gott, G. B., Myers, A. T., and  
others, 1953

uranium/ metals/ crude oil/ asphalt/ shale/  
bituminous substances/ Moffat County/ Jefferson  
County/ Rio Blanco County/ sandstone/

Erickson, R. L., Myers, A. T., and Horr, C. A., 1952

uranium/ metals/ crude oil/ asphalt/ shale/  
bituminous substances/ Moffat County/ Jefferson  
County/ Rio Blanco County/ sandstone/

Erickson, R. L., Myers, A. T., and Horr, C. A., 1954

uranium/ metals/ crude oil/ asphalt/ shale/  
bituminous substances/ Moffat County/ Jefferson  
County/ Rio Blanco County/ sandstone/

Everhart, D. L., 1954

Colorado Plateau/ sandstone/ Colorado/ New Mexico/  
Utah/ Wyoming/ veins/ Igneous-metamorphic/ San  
Miguel County/ Montrose County/ Mesa County/  
Jefferson County/ Australia/ South Africa/ Ontario/

Everhart, D. L., 1956

sandstone/ Colorado Plateau/ Front Range/ Copper  
King mine/ veins/ Larimer County/ Los Ochos  
mine/ Saguache County/ Caribou mine/ Boulder  
County/ Schwartzwalder mine/ Carroll mine/ Placerville  
district/ San Miguel County/ alteration/ pitchblende/  
Igneous-metamorphic/ Jefferson County/ Carroll  
mine/ structural tension/

Everhart, D. L., 1956

pitchblende/ Colorado Plateau/ Igneous-metamorphic/  
granite/ Front Range/ Copper King mine/ Larimer  
County/ alteration/ Los Ochos mine/ Saguache  
County/ Caribou mine/ Carroll mine/ Boulder  
County/ San Miguel County/ ore deposits/ sandstone/  
Placerville district/ Schwartzwalder mine/ Jefferson  
County/ structural tension/ United States/ Tertiary/  
veins/ alteration/

Ferris, C. S., and Bennett, N., 1977

geochemistry/ exploration/ Ladwig mine/ Jefferson  
County/ Front Range/ Igneous-metamorphic/ gneiss/  
schist/ Schwartzwalder mine/ molybdenum/

Finch, W. I., 1967

Colorado Plateau/ Front Range/ Igneous-metamorphic/  
geology/ Larimer County/ Jackson County/ Routt  
County/ Moffat County/ Garfield County/ Grand  
County/ Eagle County/ Boulder County/ Jefferson  
County/ Park County/ Mesa County/ Montrose County/  
El Paso County/ San Miguel County/ Bent County/  
Park County/ Saguache County/ Pueblo County/  
Dolores County/ Las Animas County/ Huerfano  
County/ Costilla County/ Custer County/ San  
Juan County/ La Plata County/ Montezuma County/

Flix, P. F., 1954

natural waters/ hydrogeochemical exploration/

streams/ stream sediments/ ore deposits/ ground  
water/ mine waters/ Sevier River/ Utah/ Ralston  
Creek/ Colorado/ Montana/ Schwartzwalder mine/  
Front Range/ Colorado Plateau/ Jefferson County/

Fleischer, Michael, and Harder, J. O., 1945

niblum/ tantalum/ minerals/ annotated bibliography/  
pegmatites/ placers/ uranium/ mineralogy/ Leyden  
coal mine/ Jefferson County/ coal/ quartz-carnotite  
veins/ Indium/ sandstone/ veins/ Igneous-metamorphic/

Fraser, G. D., 1948

Coal Creek Quartzite/ Igneous-metamorphic/ Jefferson  
County/ Boulder County/ Front Range/

Gabelman, J. W., 1948

geology/ Golden Gate area/ Van Bibber Creek  
area/ Jefferson County/ Front Range/ Igneous-metamorphic/

Gabelman, J. W., and Boyer, W. H., 1974

exploration/ status/ uranium/ technology/ history/  
pitchblende/ radium/ vanadium/ Colorado Plateau/  
Front Range/ Montrose County/ Mesa County/ San  
Miguel County/ Dolores County/ Moffat County/  
Jefferson County/ sandstone/ Igneous-metamorphic/  
shale/

Gable, D. J., 1968

geology/ crystalline rocks/ Morrison quadrangle/  
Jefferson County/ Igneous-metamorphic/ Front  
Range/

George, R. D., 1917

minerals/ rocks/ Colorado/ occurrences/ uses/  
Colorado Plateau/ sandstone/ Igneous-metamorphic/  
uranium/ vanadium/ radium/ carnotite/ pitchblende/  
Jefferson County/ Gilpin County/ Front Range/  
Montrose County/ San Miguel County/ Dolores  
County/ Garfield County/ Rio Blanco County/  
Routt County/ Boulder County/

George, R. D., Curtis, H. A., Lester, O. C., and  
others, 1920

Colorado Plateau/ mineralized waters/ springs/  
spring deposits/ Front Range/ Jefferson County/  
Pitkin County/ Pueblo County/ Garfield County/  
Park County/ El Paso County/ Ouray County/ Boulder  
County/ Gunnison County/ Delta County/ Chaffee  
County/

Gilbert, R. E., 1972

Jefferson County/ Schwartzwalder mine/ Front  
Range/ geology/ map/ Igneous-metamorphic/

Goldstein, E. H., 1957

ore deposits/ uraninite/ Cretaceous/ Jefferson  
County/ Dakota Sandstone/ geology/ uranium/  
igneous-metamorphic/ sandstone/ genesis/ Morrison  
(town of)/

Gott, G. B., 1950

Leyden Ridge/ Jefferson County/ Leyden uranium  
prospect/ Old Leyden coal mine/ coal/ ore deposits/  
geology/ genesis/ reserves/ sandstone/ Front  
Range/

Gott, G. B., Wyant, D. G., and Beroni, E. P., 1952

Front Range/ ore deposits/ shale/ black shale/  
lignite/ limestone/ organics/ sandstone/ coal/  
Leyden coal mine/ Jefferson County/ uranium/

Gottfried, David, 1956

Front Range/ ore deposits/ exploration/ Precambrian rocks/ Igneous complexes/ granite/ uranium/ Jefferson County/ Clear Creek County/ Gilpin County/ Pikes Peak batholith/ Log Cabin batholith/ Boulder Creek batholith/ Boulder County/ Igneous-metamorphic/

Gow, T. T., 1914

basalt/ Table Mountain/ Igneous-metamorphic/ Jefferson County/ Conejos County/ Rio Grande County/ Gilmore/ Front Range/ radioactivity/

Granger, H. C., and Beroni, E. P., 1950

Jefferson County/ Cook property/ Igneous-metamorphic/ reconnaissance/ Front Range/

Grossman, E. L., 1957

Front Range/ ore deposits/ uranium/ Gilpin County/ Clear Creek County/ Jefferson County/ Schwartzwalder mine/ pitchblende/ Igneous-metamorphic/ Ladwig mine/ Leyden mine/ Boulder County/ coal/ sandstone/ Morrison Formation/ Park County/ Gem Dandy/

Gude, A. J., 3d, and McKeown, F. A., 1952

Jefferson County/ ore deposits/ Front Range/ coal/ exploration/ drilling/ Old Leyden coal mine/ minerals/ carnotite/ Laramie Formation/ reserves/ sandstone/ shale/ veins/

Gude, A. J., 3d, and McKeown, F. A., 1953

veins/ exploration/ Jefferson County/ Old Leyden coal mine/ sandstone/ coal/ shale/ drilling/ core/ reserves/ Front Range/

Hall, C. R., 1976

alkalic/ Igneous rocks/ igneous-metamorphic/ Gilpin County/ Front Range/ bibliography/ San Juan County/ Custer County/ Fremont County/ La Plata County/ Montezuma County/ Gunnison County/ Saguache County/ El Paso County/ Rio Grande County/ Jefferson County/ Larimer County/ Boulder County/ Colorado Plateau/ Clear Creek County/ Teller County/

Hanley, J. B., Heinrich, E. W., and Page, L. R., 1950

pegmatites/ geology/ mineralogy/ Chaffee County/ Boulder County/ Clear Creek County/ Douglas County/ Fremont County/ Gunnison County/ Jefferson County/ Larimer County/ Montrose County/ Park County/ Summit County/ monazite/ thorium/ production/ Front Range/ El Paso County/ Igneous-metamorphic/ Colorado Plateau/ Wyoming/ Utah/

Harder, J. O., and Stead, F. W., 1945

Boulder County/ Gilpin County/ Gunnison County/ Mesa County/ Teller County/ ore deposits/ sandstone/ Igneous-metamorphic/ reconnaissance/ Front Range/ Colorado Plateau/ Jefferson County/

Heyse, J. V., 1971

uranium/ mineralogy/ petrology/ Schwartzwalder mine/ Jefferson County/ age estimation/ emission spectroscopy/ uraninite/ ore deposits/ Front Range/ geochemistry/ Igneous-metamorphic/ paragenesis/ pitchblende/

Hickling, N. L., Phair, G., Moore, R., and others, 1970

Boulder Creek batholith/ uranium/ thorium/ age patterns/ allanite/ mineralogy/ genesis/ paragenesis/ Igneous-metamorphic/ Jefferson County/ Clear Creek County/ Gilpin County/ Boulder County/ Larimer County/ Summit County/ Grand County/ Front Range/ Silver Plume batholith/

Kaiser, E. P., King, R. U., Wilmarth, V. R., and others, 1952

Front Range/ pitchblende/ sandstone/ coal/ shale/ Archuleta County/ Routt County/ Eagle County/ Pitkin County/ Gunnison County/ San Juan County/ Fremont County/ Huerfano County/ Ouray County/ Colorado Plateau/ ore deposits/ Moffat County/ Garfield County/ Mesa County/ Delta County/ Montrose County/ San Miguel County/ Dolores County/ Montezuma County/ La Plata County/ Larimer County/ Boulder County/ Jefferson County/ Park County/ Rio Blanco County/ Igneous-metamorphic/

## CHRONOLOGY

### AEC Domestic Uranium Raw Materials Program

1947-1965

The history of the AEC Domestic Uranium Raw Materials Program can be confusing, especially to those new in uranium exploration and development. For this reason we are including a chronology, 1947-1965, prepared as an AEC handout by Nellson B. O'Rear, Public Information Officer, Grand Junction Office, U.S. Atomic Energy Commission, May 31, 1966. We hope that this chronology will help clarify some of the questions regarding procurement programs, withdrawals, bonus payments, various circulars, and miscellaneous events through the years.

#### 1947

May 28

Concentrate purchase contract executed with Vanadium Corporation of America for Naturita, Colo., processing mill. Deliveries to AEC started late in 1947. First mill contract.

October 2

Concentrate purchase contract with U.S. Vanadium (later Union Carbide) for processing mill at Rifle, Colo. First deliveries to AEC in December, 1947.

December

Colorado Raw Materials office established in Grand Junction, Colorado, to inaugurate AEC procurement program.

#### 1948

April 8

Commission approves plan for expanding uranium production in Colorado Plateau region, including operation of a Government-owned processing mill at Monticello, Utah.

April 11

Domestic Uranium Program Circular 1 promulgated by AEC. Guaranteed for 10 years a minimum price for certain high grade uranium ores other than carnotite or roscoelite type ores. (Terminated April 11, 1958)

April 11

Domestic Uranium Program Circular 2 promulgated, offering a bonus of \$10,000 for delivery of 20 short tons of uranium-bearing ores or mechanical concentrates assaying 20 percent or more  $U_3O_8$  from any single mining location, lode, or placer, which had not previously been worked for uranium. Did not apply to carnotite or roscoelite type ores. Offer expired April 11, 1958. This bonus collected only once in 10 years.

April 11

Domestic Uranium Program Circular 3 promulgated. Provided minimum prices, specifications and conditions under which AEC would purchase carnotite and roscoelite type ores delivered at Monticello, Utah, buying station.

June 1

Domestic Uranium Program Circular 4 promulgated. Provided for payment of haulage and development allowances.

July 1

54,000 tons of ore produced in western states in FY 1948; AEC purchased 110 tons of  $U_3O_8$  in FY 1948 at cost of \$1,700,000 an average price per pound, \$7.14.

December 31

In Calendar Year 1948, U.S. Geological Survey drilled 130,000 feet of holes in AEC exploration program; estimate private industry drilled 80,000 feet.

#### 1949

February 1

Domestic Uranium Program Circular 5 promulgated. Consolidated Circulars 3 and 4; Increased price of  $U_3O_8$  by fifty cents per pound, plus premium prices and other provisions.

February 17

Contract with Vanadium Corporation of America to purchase  $U_3O_8$  from Durango, Colo., processing mill. (First deliveries to AEC in August, 1949).

April 13

Contract with U.S. Vanadium (later Union Carbide) to purchase concentrates from Uravan, Colo., mill.

May 17

First lease issued in Mineral Leasing program for mining of uranium ore on AEC-controlled lands which had been explored by AEC and certain ore reserves established. This program, authorized by the 1946 Atomic Energy Act, continued from 1949 to 1962, during which a total of 49 leases were executed between the AEC and individuals or companies. The lessees paid the Government a royalty fee for the uranium mined. (See March 31, 1962, for ore mined and fees paid Government).

May 17

Contract with VCA to purchase concentrates from mill at White Canyon, Utah. (Power plant operation). This mill went into production in 1950 and shut down in 1953 after delivering more than 125,000 pounds of  $U_3O_8$  to AEC.

July 10

AEC announces types of high-lime uranium-vanadium ores to be purchased at Monticello, Utah. (Differed from Circular 5).

August 23

AEC contracts with Galigher Company to renovate Monticello, Utah, mill (from War Assets Admin.) and operate to produce  $U_3O_8$ . Six months later the mill was producing concentrates.

December 31

In exploration program in CY 1949, AEC drilled 70,000 feet of holes and the USGS drilled 223,000 feet, for total Government drilling of 293,000 feet. Estimate private industry drilling at 120,000 feet.

1950

January

First concentrates produced by Government-owned processing mill at Monticello, Utah.

March

First concentrates received by AEC from Rifle, Colorado mill.

March 12

Marysvale, Utah, AEC ore-buying station established and schedules given.

July 1

FY 1950 ore production, 230,000 tons. FY 1950  $U_3O_8$  purchased by AEC, 320 tons at cost of \$5,800,000; average cost per pound, \$8.92.

July 10

Concentrate purchase contract executed by AEC and Climax Uranium Company for mill at Grand Junction, Colorado.

December 31

In exploration program in CY 1950, AEC drilled 156,000 feet of holes, USGS drilled 212,000, for Government total of 368,000 feet. Estimate private drilling at 410,000 feet.

1951

March 1

Domestic Uranium Program Circular 5, Revised, promulgated. Extended Circular 5 to March 31, 1962, and increased the price payable for  $U_3O_8$  in certain ores.

March 16

AEC restored 42 square miles in Colorado to public domain (through BLM) and withdrew another 86 square miles for exploration program.

March 29

AEC offers to buy copper-bearing uranium ores at Marysvale, Utah, and Monticello, Utah.

June 29

Domestic Uranium Program Circular 6 promulgated. Provided bonus payments for initial and certain other production of uranium ores to assist development of new sources. This known as "the bonus program".

June

AEC receives first concentrates from Climax Uranium mill at Grand Junction, Colorado.

July 1

FY 1951 ore production, 290,000 tons. FY 1951  $U_3O_8$  purchased by AEC, 630 tons at cost of \$12,800,000; average cost per pound, \$10.01.

August 22

AEC asked withdrawal of 66 square miles of public land in Grand County, Utah, for exploration program.

October 25

AEC executes contract with Vitro Corporation of America to buy concentrates from mill at Salt Lake City, Utah. (First  $U_3O_8$  delivered to AEC later in 1951).

December 27

AEC and the Anaconda Company execute contract for concentrates to be produced at mill at Bluewater, New Mexico (Grants area).

December 31

In CY 1951, AEC drilled 354,000 feet in exploration program, and USGS drilled 374,000 feet, for total Government drilling of 728,000 feet. Estimate private industry drilling at 700,000 feet.

1952

January 17

Bluewater, New Mexico, ore-buying station opened by Anaconda for AEC and buying schedules announced.

January 30

AEC announces over a quarter million dollars paid out in initial production bonus program in 1951. (First payments under Circular 6, promulgated June 29, 1951)

June 8

Grants, New Mexico, ore-buying station opened by AEC and buying schedules given.

July 1

In FY 1952, total of \$607,232 paid by AEC in initial production bonus program.

July 1

FY 1952 ore production, 390,000 tons. FY 1952 AEC concentrate purchases, 830 tons at cost of \$18,400,000; average cost per pound, \$11.19.

November 30

Grand Junction Operations Office established to consolidate AEC's exploration and procurement programs on the Colorado Plateau. Formerly known as Colorado Raw Materials Office. Operations Office status ranked it with major AEC field installations throughout U.S.

November 30

Edgemont, South Dakota, ore-buying station established by AEC and schedule published.

December 31

First report on access road program made by AEC, showing construction started on 428 miles of roads with total costs to be \$1,782,802.

December

CY 1952, In exploration program AEC drilled 482,000 feet and USGS 580,000 feet, for Government total of 1,062,000 feet. Estimate private industry drilled 600,000 feet.

1953

January 11

AEC announces issuance of report on uranium sampling practices on Colorado Plateau prepared by Colorado School of Mines Research Foundation.

#### April 12

AEC announces policy of posting results of airborne surveys of radioactivity on the 15th of each month in public places throughout the West. (This airborne program continued until 1956 when it was no longer necessary. AEC had as many as a dozen planes flying at one time).

#### July 1

FY 1953 ore production, 610,000 tons. FY 1953 concentrates purchased by AEC, 990 tons at cost of \$24,200,000, with average price per pound of \$12.30.

#### August 17

AEC signs contract with Kerr-McGee Oil Industries, Inc., to buy concentrates from Shiprock, New Mexico, mill.

#### September

Anaconda mill at Bluewater, New Mexico, delivers first concentrate to AEC.

#### September 23

AEC announces extension of Circular 5, Revised, through March 31, 1962, and extension of Circular 6 (bonus) from February 24, 1954, to February 28, 1957.

#### November 17

AEC reports initial production bonus payments total 2 1/2 million dollars since start March 1, 1951.

#### December 31

In CY 1953, AEC requested seven separate public land withdrawals for the exploration program.

#### December 31

In exploration program, AEC drilled 600,000 feet and USGS drilled 715,000 feet, for total Government drilling of 1,315,000 feet. Estimate private industry drilling at 2,700,000 feet.

### 1954

#### January 29

Domestic Uranium Program Circular 7 promulgated. Provided for AEC to issue mining leases on certain public lands. Terminated on December 18, 1954, with passage of Public Law 585.

#### February 23

AEC announces bonus payments over \$3 million since the beginning on March 1, 1951. Current rate of payments at \$175,000 a month.

#### March 30

AEC announces ore-crushing and sampling plant to be built at Moab, Utah.

#### May 5

Contract signed for expansion of Government-owned Monticello, Utah, processing mill to treat refractory ores.

#### May 9

Provisional ore-buying station established by AEC at Moab, Utah.

#### May 18

Contract signed for expansion of Anaconda's Bluewater, New Mexico, mill to treat sandstone gangue ores.

#### July 1

FY 1954 ore production, 914,000 tons. FY 1954 concentrate purchases by AEC, 1,450 tons costing \$35,600,000; average price per pound, \$12.25.

#### July 7

AEC announces ore-buying station to open in White Canyon, Utah, in August, 1954.

#### July 20

AEC announces progress in construction of ore-testing pilot plant at Grand Junction Operations Office. This plant began operations in July, 1954 and ran continuously until June of 1958. Approximately 30,000 tons of ore from 40 different mines were tested in this plant.

#### September 15

Another expansion of Anaconda's Bluewater, New Mexico uranium processing plant announced.

#### October 12

AEC announces plans to establish ore-buying station at Riverton, Wyoming. (Opened for business March 1, 1955).

#### October 25

Expansion of Climax Uranium Company mill at Grand Junction announced.

#### November 1

Shiprock, New Mexico processing mill at Kerr-McGee Oil Industries goes into operation.

#### November 30

Capacity increased at Naturita, Colorado processing mill operated by Vanadium Corporation of America.

#### December 31

In CY 1954, approximately 133,000 acres in Colorado and Utah restored to public domain at request of AEC. Had been withdrawn in exploration program.

#### December 31

In CY 1954, in exploration program, AEC drilled 613,000 feet of holes and the USGS drilled 497,000 feet, for Government total of 1,110,000. Estimate private industry drilled 3,500,000 feet.

#### December 31

In access road program in CY 1954, projects on 72 1/2 miles of roads started at total cost of \$287,732.

### 1955

#### January

First concentrate received from Shiprock, New Mexico mill of Kerr-McGee.

#### March 1

Announce ore-buying station to open at Globe, Arizona. (Opened July 5, 1955).

March 5

Announce ore-buying station for Green River, Utah. (cancelled later).

March 30

AEC announces plans to make tests on uranium-bearing lignite, but no buying program at that time.

April 8

AEC announces bonus payments pass \$5 million mark since start of program March 1, 1951. To date, 2,889 payments totaling \$5,001,019. Rate of payments per month, \$195,000.

April 29

Contract executed for purchase of concentrates from Edgemont, South Dakota, mill operated by Mines Development, Inc.

June 17

AEC executed contract with Uranium Reduction Company for Moab, Utah, processing mill. (Later acquired by Atlas Corporation).

July 1

FY 1955 ore production, 1,306,000 tons. FY 1955 concentrate purchases, 2,140 tons at cost of \$53,600,000; average price per pound, \$12.51.

July 15

Tuba City, Arizona, mill contract signed with Rare Metals Corp. (Later, El Paso Natural Gas Company).

August 6

Announce expansion of U.S. Vanadium (later Union Carbide) processing mill at Uravan.

August 10

Executed contract with Trace Elements Corp., for mill at Maybell, Colorado. (Later, Union Carbide).

November 29

Contract with Continental Uranium, Inc., for mill at LaSal, Utah. (Never built and contract cancelled).

December 31

In CY 1955, AEC requested restoration of approximately 84,000 acres of public land in Wyoming, Colorado and Utah.

December 31

In CY 1955 exploration program, AEC drilled 316,000 feet of holes and USGS drilled 213,000, for Government total of 529,000 feet. Estimate of private drilling was 5,500,000 feet.

December 31

In CY 1955, access road projects totaling 110 miles and costing \$1,874,184 started under AEC auspices.

1956

January 12

AEC to open ore-buying station at Tuba City, Arizona.

January 15

AEC to open ore-buying station at Grants, New Mexico. (Began receiving ore July 5, 1956).

March 27

National Lead Company gets contract to operate Government-owned processing mill at Monticello, Utah, succeeding the Galigher Company.

May 24

AEC announces uranium procurement program for 1962-1966 period and extends initial production bonus to March 31, 1960.

June 2

Contract with Atomic Fuel Extraction Corporation for mill at Bedrock, Colorado. (Mill never built and contract cancelled).

June 8

Contract with Union Carbide Nuclear Company, for new mill at Rifle, to replace old one.

June 23

Reorganization of field activities of Division of Raw Materials under which GJ00 would direct all AEC exploration activities west of the Mississippi River, in addition to continuing the ore and concentrate procurement programs in same geographical area.

July 1

FY 1956 ore production, 2,185,000 tons. FY 1956 concentrate purchases, 4,200 tons at cost of \$97,800,000; average cost per pound, \$11.63.

July 1

Bonus payments FY 1956 total \$2,237,949.

July

First concentrate received from Tuba City, Arizona, mill operated by El Paso.

July 13

Domestic Uranium Program Circular 8 effective. Established regulations governing the issuance of leases for mining uranium deposits on certain withdrawn public lands. (Formalized the Mineral Leasing program in operation since 1949 under the Atomic Energy Act of 1946).

July 17

Contract with Texas-Zinc Minerals Company for processing mill at Mexican Hat, Utah.

August

First concentrates received from mill at Edgemont, So. Dakota, operated by Mines Development, Inc.

August 8

Contract executed with Dawn Mining Company for mill at Ford, Washington.

August 15

Contract executed with Lost Creek Oil & Uranium Co., (later Western Nuclear) for mill in Fremont County, Wyoming.

August 16

AEC revised procedures for releasing airborne survey maps.

August 22

Domestic Uranium Program Circular 5, Revised, is modified to eliminate requirements for proof of development allowance funds.

October 18

New AEC-Vitro contract increases capacity of mill and extends contract from December, 1958, to March, 1962.

October 24

Moab, Utah, ore-buying station to go on standby basis November 1, 1956.

November

First concentrate from URC mill at Moab, Utah, received by AEC.

November 11

Contract with Trace Elements Corp., for Maybell mill (supersedes contract executed in August, 1955). Union Carbide later bought out Trace Elements.

November 15

Contract executed for Gas Hills, Wyoming, processing mill with Lucky Mc Uranium (later Utah Construction and Mining Company).

November 16

Contract with Gunnison Mining Co., for processing mill at Gunnison, Colorado.

December 14

AEC announces plans for provisional ore-buying station at Crooks Gap, Wyoming.

December 20

AEC contract with Homestake-New Mexico Partners for processing mill at Grants, New Mexico.

December 31

In CY 1956, AEC initiated 8 separate actions to restore 148,000 acres to the public domain in Colorado, Utah and New Mexico.

December 31

In CY 1956, AEC drilled 14,000 feet and USGS drilled 26,000 feet in exploration program. Estimate private industry drilled 8,750,000 feet. (The final AEC drilling contract was let in 1956; private industry had taken over and there was no need for further Government drilling.)

December 31

In CY 1956, access road program saw start of work on 48 miles of roads at total cost of \$559,381.

1957

January 1

Globe, Arizona, AEC ore-buying station to close June 30, 1957.

February 5

Marysville, Utah, AEC ore-buying station to close March 15, 1957.

March 4

Domestic Uranium Program Circular 9 promulgated. Deals with prospecting permits on certain lands.

April 2

AEC requests restoral to public domain of about 95,000 acres in Colorado.

April 24

AEC signs contract with Homestake-Sapin Partners for mill at Grants, New Mexico.

May 3

AEC signs contract with Kermac Nuclear Fuels Corporation for processing mill at Grants, New Mexico.

May 23

AEC signs contract with Cotter Corporation to purchase concentrates from pilot plant at Canon City, Colorado.

July 1

FY 1957 ore production, 3,303,000 tons. FY 1957 AEC concentrate purchases, 7,580 tons at cost of \$159,600,000; average cost per pound, \$10.53.

July 1

Bonus payments by AEC in Fiscal Year 1957 totaled \$2,982,965.

July 15

AEC announces White Canyon, Utah, buying station to close July 31, 1957.

July 19

AEC announces discontinuance of ore buying at Crooks Gap, Wyoming.

August

First concentrates received by AEC from Western Nuclear, Inc., mill in Wyoming.

September

First concentrate received by AEC from Dawn Mining Company mill at Ford, Washington.

September 17

AEC signs contract with Phillips Petroleum Company for processing mill at Grants, New Mexico.

October 28

Address by Director, Division of Raw Materials, before Atomic Industrial Forum in New York City in which it was stated that "We have arrived at the point where it is no longer in the interest of the Government to expand the production of uranium concentrate."

November

First concentrate received by AEC from Texas-Zinc mill at Mexican Hat, Utah.

November 18

AEC signs contract with Lakeview Mining Company for processing mill at Lakeview, Oregon.

December 4

AEC signs contract with Fremont Minerals (Later, Susquehanna-Western, Inc.) for a mill at Riverton, in Fremont County, Wyoming.

December

First concentrate received by AEC from Maybell, Colo., processing mill owned by Union Carbide.

December 5

Reorganization of the Grand Junction Operations Office affecting units responsible for programs for the evaluation of source material resources, uranium ore procurement, mining incentives, and the acquisition and production of uranium concentrates.

December 31

CY 1957, there was no AEC or USGS exploratory drilling. It was estimated that private industry drilled 9,200,000 feet.

December 31

Access road program in CY 1957 saw projects begun on 30 miles of roads at total cost of \$1,483,976.

1958

January 24

Riverton, Wyoming, AEC ore-buying station closed.

March

First concentrate received by AEC from Utah Construction & Mining Company mill in Wyoming.

April 2

AEC announces program modification to permit a limited expansion of the domestic uranium industry by providing a market for certain ore reserves developed prior to November 1, 1957.

April 24

AEC requests restoral to public domain of 21,440 acres in Utah.

April 28

Lisbon Uranium Company of Salt Lake City collects the \$10,000 bonus under Circular 2 only two days before the circular expired on April 11.

May 8

AEC announces plan to permit private sales of uranium.

July 1

FY 1958 ore production, 4,416,000 tons. FY 1958 AEC concentrate purchases, 10,250 tons at cost of \$196,000,000; average cost per pound, \$9.57.

July 1

FY 1958 bonus payments total \$2,040,118.

August

First concentrate received from Cotter pilot plant at Canon City, Colorado.

August

First concentrate received by AEC from Phillips Petroleum Company mill at Grants, New Mexico.

August 6

Texas-Zinc Minerals contract for Mexican Hat mill extended from March, 1962, to December 31, 1966.

August 27

AEC announces discontinuance of ore buying at Grants, New Mexico, station.

September

AEC receives first concentrate from Homestake-Sapin mill at Grants, New Mexico.

November 24

AEC announces modification of procurement program, establishing November 24, 1958, as cutoff date for eligible ores from which concentrates could be derived for sale to Government in 1962-66 period. (Allocation system also established later by AEC as part of this program).

December

AEC receives first concentrates from Kermac processing mill at Grants, New Mexico.

December 31

AEC estimates private industry drilled 7,300,000 feet of exploratory holes. (AEC and USGS had discontinued exploratory drilling).

1959

January

First concentrate received from Susquehanna-Western mill at Riverton, Wyoming.

February 27

AEC contract with Western Nuclear extended to December 31, 1966, and capacity of mill increased.

April 10

AEC signs contract with Federal-Radrock-Gas Hills Partners for processing mill in Fremont County, Wyoming.

May 1

AEC extends contract with Lucky Mc Uranium Corp., (later, Utah Construction & Mining) from July 1, 1959, to December 31, 1966.

May 9

AEC announces Government-owned processing mill at Monticello, Utah, will be closed January 1, 1960.

May 13

AEC signs contract with Globe Mining Co., (later, Union Carbide) for new processing mill in Natrona County, Wyoming.

May 14

Initial production bonus payments to March 31, 1959, total \$14,327,200 on 1,015 certified properties under Circular 6.

May 18

AEC requests ore reserve data by August 1, 1959, under terms of November 24, 1958, announcement. (Deadline later extended to October 1, 1959).

July 1

FY 1959 uranium ore production, 6,117,000 tons. FY 1959, AEC bought 15,160 tons of U<sub>3</sub>O<sub>8</sub> at cost of \$280,500,000; average price per pound, \$9.25.

August 3

AEC contract with Uranium Reduction (later Atlas) amended and extended to December 31, 1966.

November 24

AEC contract with Kerr-McGee (Shiprock mill) extended to June 30, 1965.

December 1

AEC estimates domestic recoverable uranium ore reserves at 88,900,000 tons.

December 11

AEC contract with Anaconda Company for Bluewater, New Mexico mill extended to December 31, 1966.

December 17

Copper concentrate purchase contract extended to March 1, 1960. (Pilot plant enlarged to full scale mill).

December

First concentrate delivered to AEC from Federal processing mill in Wyoming.

1960

January 1

Government-owned uranium processing mill at Monticello, Utah, is closed.

February 1

First concentrate received by AEC from Globe mill in Natrona County, Wyoming.

March 29

AEC contract with Phillips Petroleum Co., amended to provide for deferral of 1,000,000 pounds of  $U_3O_8$  to the 1962-1966 period.

March 31

Initial production bonus program (Circular 6) terminates. From beginning March 1, 1951, to date, total of approximately \$17,700,000 paid on 1,281 certified properties.

April 26

Dawn Mining Co. processing contract extended to December 31, 1966, from March 31, 1962.

May 27

AEC sold 1,581,000 pounds of vanadium pentoxide to Vanadium Corporation of America for \$1 per pound.

July 1

In FY 1960, uranium ore production, 7,606,309 tons. In FY 1960, AEC bought 16,403 tons of  $U_3O_8$  at cost of \$287,140,064; average price per pound, \$8.75.

July 25

AEC signs  $U_3O_8$  purchase contract with Susquehanna-Western, Inc., for mill at Falls City, Texas; runs to December 31, 1966.

July 27

AEC-Homestake-Sapin contract extended from April 1, 1960, to December 31, 1966.

August 12

AEC signs contract with Petrotomics Company to purchase concentrate from Shirley Basin (Wyo.) ores. (Mill built later by Petrotomics).

September 22

AEC-Climax contract extended to December 31, 1966, from August 1, 1960.

November

Lakeview Mining Co., processing mill at Lakeview, Oregon, closed. Assets acquired by Kermac.

1961

January 4

AEC-Susquehanna-Western contract for Riverton mill extended from June 1, 1960, to December 31, 1966.

February 2

AEC sold 1,139,900 pounds of vanadium pentoxide to private industry firms for \$1,152,756.

February 13

AEC exempts uranium miners from source material license rules.

February 21

Uranium mineral belt policy statement issued. Established historical production rate as basis for allocations.

March 21

AEC extends contract with Trace Elements (unit of Union Carbide) from March 31, 1962, to December 31, 1966.

May 1

AEC-Union Carbide Corporation contract for Rifle and Uravan mills extended from March 31, 1962, to December 31, 1966.

May 22

AEC-VCA contract for Durango mill extended from March 31, 1962, to December 31, 1966.

June

First concentrate received by AEC from Susquehanna-Western mill at Falls City, Texas.

July 1

FY 1961, uranium ore production 8,300,198 tons. (Peak year). FY 1961, AEC bought 17,671 tons of  $U_3O_8$  at a cost of \$299,340,000. (Peak year). Average cost per pound, \$8.47.

August

Grand Junction Operations Office changed to Grand Junction Office.

August 16

AEC-Kerr-McGee Shiprock mill contract extended from June 30, 1965, to December 31, 1966.

November 9

AEC modifies contract with Homestake-Sapin Partners to replace prior existing contracts with Homestake-Sapin Partners and Homestake-New Mexico closed in April, 1962.

1962

March 14

AEC announces Monticello, Utah, ore-buying station to close March 31, 1962.

March 19

AEC-Mines Development contract for Edgemont mill extended from September 1, 1961, to December 31, 1966.

March 31

Termination of Domestic Uranium Program Circular 5, Revised, which provided for minimum ore prices, premium prices, haulage and development allowances, etc.

March 31

Last ML lease (Mineral Leasing program) expires. Between 1949 and 1962, a total of 49 such leases executed, with a peak 30 active leases operating in 1954. Total ore production during program was 1,251,971 tons of ore averaging 0.29 percent  $U_3O_8$  and yielding 7,261,000 pounds of  $U_3O_8$ . The ore also yielded 40,824,000 pounds of vanadium ( $V_2O_5$ ). The Government received \$5,890,391 in royalties during the program.

1962

April

AEC receives first concentrates from Perotomics Company mill in Wyoming's Shirley Basin area.

April

Gunnison Mining Company, mill at Gunnison, Colorado, closed and assets acquired by Kermac.

April 9

AEC extends concentrate contract with Vitro, Salt Lake City, from March 31, 1962 to December 31, 1963.

June 29

AEC relaxes restrictions for small mines producing less than 20,000 pounds of  $U_3O_8$  for year.

July 1

FY 1962, uranium ore production, 7,965,291. FY 1962, AEC bought 17,248 tons of  $U_3O_8$  at a cost of \$281,180,000; average price per pound, \$8.00

August 18

AEC announces assignment of Uranium Reduction Company contract (Moab, Utah, mill) to Atlas Corporation.

November 17

AEC announces domestic uranium procurement program through December 31, 1970. (stretch-out program).

November 19

AEC-El Paso contract for Tuba City, Arizona, mill extended from September 30, 1962, to December 31, 1966.

1963

February 25

AEC transfers Phillips processing mill contract to United Nuclear Corporation. Phillips mill closed March, 1963, and United Nuclear ores tolled through Homestake-Sapin mill in Grants, New Mexico, area.

March

VCA's processing mill at Durango, Colorado, closed. VCA acquired Kerr-McGee mill at Shiprock, New Mexico. The AEC-Kerr-McGee contract assigned to VCA for Shiprock mill.

May

Susquehanna-Western processing mill at Riverton, Wyoming, closed and arrangements made to toll some ores through Federal mill.

July 1

FY 1963, uranium ore production, 6,435,359 tons. FY 1963, AEC bought 15,760 tons of  $U_3O_8$  at cost of \$246,210,000; average price per pound, \$8.00.

July 12

AEC announces appointment of Rafford L. Faulkner as Director of the Division of Raw Materials to succeed Jesse C. Johnson, retired.

July 25

AEC-Vitro contract for Salt Lake City mill extended from December 31, 1963, to December 31, 1966.

July 31

AEC approves consolidation of contracts of Atlas Corporation (Moab mill) and Texas-Zinc Minerals (Mexican Hat mill).

December 27

AEC announces signing of first stretch-out contract under the November 17, 1962 announcement with the Anaconda Company for the processing mill at Bluewater, New Mexico. Anaconda deferred approximately 3,000,000 pounds of  $U_3O_8$  from the 1962-1966 period to 1967 and 1968.

1964

January 10

AEC announces uranium procurement program not affected by fissionable materials cutback; procurement commitments through 1970 to be carried out.

March 13

Second stretch-out contract signed with Western Nuclear for processing mill in Wyoming. Western Nuclear deferred approximately 2,500,000 pounds of  $U_3O_8$ .

May 13

Third stretch-out contract signed with Union Carbide Corp., for processing mill in Wyoming, formerly Globe Mining Co. Union Carbide deferred approximately 758,000 pounds of  $U_3O_8$ .

July 1

FY 1964 uranium ore production, 5,430,471 tons. FY 1964, AEC bought 12,583 tons of  $U_3O_8$  at cost of \$201,370,000; average price per pound, \$8.00

July 2

Fourth stretch-out contract signed with Utah Construction & Mining Co., for processing mill in Wyoming. Utah deferred approximately 2,100,000 pounds of  $U_3O_8$ .

August 28

Fifth stretch-out contract signed with Kermac Nuclear Fuels Corp., for mill at Grants, New Mexico. Kermac deferred approximately 6,000,000 pounds of  $U_3O_8$ .

December 10

Sixth stretch-out contract signed with Federal-Radorock-Gas Hills Partners for mill in Wyoming. Federal deferred approximately 1,400,000 pounds of  $U_3O_8$ .

1965

January 28

Seventh stretch-out contract signed with Federal-Radorock-Gas Hills Partners for mill in Wyoming. Federal deferred approximately 1,400,000 pounds of  $U_3O_8$ .

February

Cotter Corporation processing mill at Canon City, Colo., closed upon expiration of AEC contract.

June

Dawn Mining Company mill at Ford, Washington closed.

June 23

Eighth stretch-out contract signed with Homestake-Sapin Partners for mill at Grants, New Mexico. Homestake-Sapin deferred approximately 4,100,000 pounds of  $U_3O_8$ .

July 1

FY 1965 uranium ore production, 4,896,239 tons. FY 1965, AEC bought 11,819 tons of  $U_3O_8$  at cost of \$181,100,000; average price per pound, \$8.00.

July 27

AEC-Vitro contract for Salt Lake City mill terminated at request of Vitro because of declining ore production in district.

August 5

Ninth stretch-out contract signed with United Nuclear Corp., operators in Grants, New Mexico, area. United Nuclear deferred approximately 3,800,000 pounds of  $U_3O_8$ . United Nuclear had choice of operating own mill or tolling through Homestake-Sapin mill. (At end of 1965, UN was tolling through Homestake.)

October 28

Tenth stretch-out contract signed with Union Carbide Corp., for processing mills at Uravan and Rifle, Colorado. Carbide deferred approximately 2,520,000 pounds of  $U_3O_8$ .

November 26

Eleventh and last stretch-out contract signed with Vanadium Corporation of America for mill at Shiprock, New Mexico. VCA deferred approximately 867,000 pounds of  $U_3O_8$ .

Summarizing the stretch-out program, AEC announced that in the eleven contracts executed, about 15,300 tons of  $U_3O_8$  had been deferred from the 1962-1966 period for delivery in 1967 and 1968 at \$8 per pound, and that the AEC expected to buy an additional 15,300 tons in 1969 and 1970 at an average price within the range of \$5.50 to \$6.00 per pound.

NOTE: This chronology of the Domestic Uranium Raw Materials program, 1947-1965, prepared by Neilsen B. O'Rear, Public Information Officer, Grand Junction Office, U.S. Atomic Energy Commission. Work was completed May 31, 1966.

## Appendix 2

### CHEMICAL CLASSIFICATION OF THE URANIUM AND THORIUM MINERALS

(From Frondel, J. W. et al, 1967, Glossary of Uranium- and Thorium-Bearing Minerals, U.S. Geological Survey Bulletin 1250, 69 p.)

#### Arsenates:

- Abernathylite  $K_2(UO_2)_2(AsO_4)_2 \cdot 6H_2O$   
Arsenuranylite  $Ca(UO_2)_4(AsO_4)_2(OH)_4 \cdot 6H_2O$   
Hallimondite  $Pb_2(UO_2)(AsO_4)_2$   
Heinrichite  $Ba(UO_2)_2(AsO_4)_2 \cdot 10-12H_2O$   
Hügelite  $Pb_2(UO_2)_3(AsO_4)_2(OH)_4 \cdot 3H_2O$   
Kahlerite  $Fe(UO_2)_2(AsO_4)_2 \cdot nH_2O$   
Metaheinrichite  $Ba(UO_2)_2(AsO_4)_2 \cdot 8H_2O$   
Metakahlerite  $Fe(UO_2)_2(AsO_4)_2 \cdot 8H_2O$   
Metakirchheimerite  $Co(UO_2)_2(AsO_4)_2 \cdot 8H_2O$   
Metanovacekite  $Mg(UO_2)_2(AsO_4)_2 \cdot 4H_2O$   
Meta-uranospinite  $Ca(UO_2)_2(AsO_4)_2 \cdot 8H_2O$   
Metazeunerite  $Cu(UO_2)_2(AsO_4)_2 \cdot 8H_2O$   
Novacekite  $Mg(UO_2)_2(AsO_4)_2 \cdot 8-10H_2O$   
Paulite  $HA(UO_2)_4(AsO_4)_4 \cdot 16H_2O(?)$   
Sodium uranospinite  $(Na_2, Ca)(UO_2)_2[As, P]O_4]_2 \cdot 5H_2O$   
Troegerite  $H_2(UO_2)_2(AsO_4)_2 \cdot 8H_2O$   
Uranospathite  $Cu(UO_2)_2(AsO_4, PO_4)_2 \cdot 11H_2O(?)$   
Uranospinite  $Ca(UO_2)_2(AsO_4)_2 \cdot 10H_2O$   
Walpurgite  $Bi_4(UO_2)(AsO_4)_2O_4 \cdot 3H_2O$   
Zeunerite  $Cu(UO_2)_2(AsO_4)_2 \cdot 10-12H_2O$

#### Carbonates:

- Andersonite  $Na_2Ca(UO_2)(CO_3)_3 \cdot 6H_2O$   
Bayleyite  $Mg_2(UO_2)(CO_3)_3 \cdot 18H_2O$   
Liebigite  $Ca_2(UO_2)(CO_3)_3 \cdot 10H_2O$   
Mackelveyite Near  $Na_2Ba_4Ca(Y, U)_2(CO_3)_9 \cdot 5H_2O$   
Metazellerite  $Ca(UO_2)(CO_3)_2 \cdot 3H_2O$   
Rabbitite  $Ca_3Mg_3(UO_2)_2(CO_3)_6(OH)_4 \cdot 18H_2O$

Rutherfordine  $(\text{UO}_2)\text{CO}_3$

Schroëckingerite  $\text{NaCa}_3(\text{UO}_2)(\text{CO}_3)_3(\text{SO}_4)\text{F} \cdot 10\text{H}_2\text{O}$

Sharplite  $(\text{UO}_2)(\text{CO}_3) \cdot \text{H}_2\text{O}$  or  $6\text{UO}_3 \cdot 5\text{CO}_2 \cdot 7\text{H}_2\text{O}$

Studtite Hydrated carbonate of U and Pb.

Swartzite  $\text{CaMg}(\text{UO}_2)(\text{CO}_3)_3 \cdot 12\text{H}_2\text{O}$

Thorbastnaesite  $\text{Th}(\text{Ce}, \text{Ca})(\text{CO}_3)_2\text{F}_2 \cdot 3\text{H}_2\text{O}$

Voglite  $\text{Ca}_2\text{Cu}(\text{UO}_2)(\text{CO}_3)_4 \cdot 6\text{H}_2\text{O}$

Widenmannite Carbonate of U and Pb.

Wyartite  $\text{UO}_2 \cdot 6\text{UO}_3 \cdot 2\text{CO}_2 \cdot 3\text{CaO} \cdot 12\text{--}14\text{H}_2\text{O}$

Zellerite  $\text{Ca}(\text{UO}_2)(\text{CO}_3)_2 \cdot 5\text{H}_2\text{O}$

#### Molybdates:

Calcurmollite  $\text{Ca}(\text{UO}_2)_3(\text{MoO}_4)_3(\text{OH})_2 \cdot 11\text{H}_2\text{O}$

Cousinite  $\text{MgO} \cdot 2\text{MoO}_3 \cdot 2\text{UO}_2 \cdot 6\text{H}_2\text{O}$

Iriginite  $\text{UO}_3 \cdot 2\text{MoO}_3 \cdot 3\text{H}_2\text{O}$

Moluranite  $\text{UO}_2 \cdot 3\text{UO}_3 \cdot 7\text{MoO}_3 \cdot 20\text{H}_2\text{O}$

Mourite Hydrated uranous uranic molybdate.

Sedovite  $\text{U}(\text{MoO}_4)_2(?)$

Umoholite  $(\text{UO}_2)(\text{MoO}_4) \cdot 4\text{H}_2\text{O}(?)$

Wulfenite  $\text{Pb}(\text{Mo}, \text{U})\text{O}_4$

#### Niobates-tantalates-titanates:

Aeschynite  $(\text{Ce}, \text{Ca}, \text{Fe}^{+2}, \text{Th})(\text{Ti}, \text{Nb})_2(\text{O}, \text{OH})_6$

Betafite  $\text{A}_{2-x}\text{B}_2\text{O}_6(\text{O}, \text{OH})_x$ , where  $\text{A}=\text{Ca}, \text{Na}, \text{U}, \text{Ce}$ ;  $\text{B}=\text{Nb}, \text{Ta}, \text{Ti}, \text{Fe}$ .

Brannerite  $\text{AB}_2\text{O}_6$ , where  $\text{A}=\text{U}, \text{Ca}, \text{Fe}, \text{Th}, \text{Y}$ ;  $\text{B}=\text{Ti}$  mainly and  $\text{Fe}$ .

Calcioclosamarskite Probably  $(\text{Ca}, \text{Y}, \text{Ce}, \text{U}, \text{Th})_3(\text{Nb}, \text{Ta}, \text{Fe}, \text{Ti}, \text{Sn})_5\text{O}_{15}(?)$

Davidite  $\text{A}_6\text{B}_{15}(\text{O}, \text{OH})_{36}$ , where  $\text{A}=\text{Fe}^{+2}$ , rare earths,  $\text{U}^{+6}$ ,  $\text{Ca}, \text{Zr}, \text{Th}$ ;  $\text{B}=\text{Ti}, \text{Fe}^{+3}$ .

Euxenite  $(\text{Y}, \text{Ca}, \text{Ce}, \text{U}, \text{Th})(\text{Nb}, \text{Ta}, \text{Ti})_2\text{O}_6$

Fergusonite  $(\text{Y}, \text{Er}, \text{Ce}, \text{Fe})(\text{Nb}, \text{Ta}, \text{Ti})\text{O}_4$

Formanite  $(\text{Y}, \text{U}, \text{Th}, \text{Ca})(\text{Ta}, \text{Nb}, \text{Ti})\text{O}_4$

Hielmite  $(\text{Y}, \text{Fe}, \text{U})(\text{Nb}, \text{Ta}, \text{Sn}, \text{W})_2\text{O}_6$

Ishikawaite  $(\text{U}, \text{Fe}, \text{Y}, \text{Ce})(\text{Nb}, \text{Ta})\text{O}_4$

Khlopinite  $(\text{Y}, \text{U}, \text{Th})_3(\text{Nb}, \text{Ta}, \text{Ti}, \text{Fe})_7\text{O}_{20}(?)$

Kobelite  $\text{AB}_2(\text{O}, \text{OH})_6$ , where  $\text{A}=\text{Y}, \text{U}$ ;  $\text{B}=\text{Ti}$  mainly,  $\text{Fe}^{+3}$ ,  $\text{Nb}, \text{Ta}$

Loparite  $(\text{Na}, \text{Ce}, \text{Th})_{1-x}(\text{Nb}, \text{Ti})[\text{O}_{3-x}(\text{OH})_x]$

Microlite  $\text{A}_2\text{B}_2\text{O}_6(\text{O}, \text{OH}, \text{F})$ , where  $\text{A}=\text{Na}, \text{Ca}, \text{Fe}^{+2}, \text{U}^{+4}, \text{Sb}^{+3}, \text{Pb}, \text{Th}, \text{Zr}, \text{Ce}, \text{Y}$ ;  $\text{B}=\text{Nb}, \text{Ta}, \text{Ti}, \text{Sn}, \text{Fe}^{+3}$ .

Niobo-aeschnite  $(\text{Ce}, \text{Y}, \text{Ca}, \text{Fe}, \text{Th})(\text{Nb}, \text{Ti})_2\text{O}_6$   
 Nohite  $(\text{Ca}, \text{Mg}, \text{Fe}^{+2}, \text{Y}, \text{U})_2(\text{Nb}, \text{Zr}, \text{Fe}^{+3})_3\text{O}_{10}$   
 Obruchevite  $(\text{Y}, \text{Na}, \text{Ca}, \text{U})(\text{Nb}, \text{Ta}, \text{Ti}, \text{Fe})_2(\text{O}, \text{OH})_7 \cdot \text{H}_2\text{O}$   
 Plsekite Niobate-tantalate-titanate of U and rare earths, with Th and Sn.  
 Polycrase  $(\text{Y}, \text{Ca}, \text{Ce}, \text{U}, \text{Th})(\text{Ti}, \text{Nb}, \text{Ta})_2\text{O}_6$   
 Priorite  $(\text{Y}, \text{Er}, \text{Ca}, \text{Fe}^{+2}, \text{Th})(\text{Ti}, \text{Nb})_2\text{O}_6$   
 Pyrochlore  $\text{A}_2\text{B}_2\text{O}_6(\text{O}, \text{OH}, \text{F})$ , where  $\text{A} = \text{Na}, \text{Ca}, \text{U}, \text{Th}, \text{Ce}, \text{Y}$ ;  $\text{B} = \text{Nb}, \text{Ta}, \text{Ti}$ .  
 Samarskite  $(\text{Y}, \text{Ce}, \text{U}, \text{Ca}, \text{Fe}, \text{Pb}, \text{Th})(\text{Nb}, \text{Ta}, \text{Ti}, \text{Sn})_2\text{O}_6$   
 Sinclite  $\text{AB}_2(\text{O}, \text{OH})_7$ , where  $\text{A} = \text{Ce}, \text{Y}, \text{Th}, \text{U}$ ;  $\text{B} = \text{Ti}, \text{Nb}$  mainly  
 Thorutite  $(\text{Th}, \text{Ca}, \text{U})\text{Ti}_2(\text{O}, \text{OH})_6$   
 Yttrocraolite  $(\text{Y}, \text{Th}, \text{U}, \text{Ca})_2\text{Ti}_4\text{O}_{11} (?)$   
 Yttrotantalite  $(\text{Fe}, \text{Y}, \text{U})(\text{Nb}, \text{Ta})\text{O}_4$   
 Zirkelite  $(\text{Ca}, \text{Fe}, \text{Th}, \text{U})_2(\text{Ti}, \text{Nb}, \text{Zr})_2\text{O}_7 (?)$

#### Oxides:

Becquerelite  $7\text{UO}_3 \cdot 11\text{H}_2\text{O}$   
 Billietite  $\text{BaO} \cdot 6\text{UO}_3 \cdot 11\text{H}_2\text{O}$   
 Cerlanite  $(\text{Ce}, \text{Th})\text{O}_2$   
 Clarkeite  $(\text{Na}, \text{Ca}, \text{Pb}, \text{Th}, \text{H}_2\text{O})\text{U}_2(\text{O}, \text{H}_2\text{O})_7$   
 Compregnacite  $\text{K}_2\text{O} \cdot 6\text{UO}_3 \cdot 11\text{H}_2\text{O}$   
 Curite  $3\text{PbO} \cdot 8\text{UO}_3 \cdot 5\text{H}_2\text{O}$   
 Fourmarierite  $\text{PbO} \cdot 4\text{UO}_3 \cdot 5\text{H}_2\text{O}$   
 Hydronasturan  $\text{UO}_2 \cdot k\text{UO}_3 \cdot n\text{H}_2\text{O}$ , where  $k = 2.3$  to  $5.0$ ;  $n = 3.9$  to  $9.0$   
 Ianthininite  $\text{UO}_2 \cdot 5\text{UO}_3 \cdot 10-11\text{H}_2\text{O}$   
 Masuyite  $\text{UO}_3 \cdot 2\text{H}_2\text{O}$   
 Parapitchblende Oxide of uranium, chiefly  $\text{U}^{+6}$ , minor  $\text{U}^{+4}$ .  
 Richetite Contains Pb and U.  
 Schoepite  $\text{UO}_3 \cdot 2\text{H}_2\text{O}$   
 Thorlanite  $(\text{Th}, \text{U})\text{O}_2$   
 Uraninite  $(\text{U}^{+4}_{1-x}, \text{U}^{+6}_x)\text{O}_2 + x$   
 Uranosphaerite  $\text{BiUO}_4(\text{OH})$   
 Urgite  $\text{UO}_3 \cdot n\text{H}_2\text{O}$   
 Vandenbrandelite  $\text{CuUO}_4 \cdot 2\text{H}_2\text{O}$   
 Vandendriesscheite  $\text{PbO} \cdot 7\text{UO}_3 \cdot 12\text{H}_2\text{O} (?)$   
 Wölsendorflite  $(\text{Pb}, \text{Ca})\text{U}_2\text{O}_7 \cdot 2\text{H}_2\text{O}$

# Phosphates:

- Autunite  $\text{Ca}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 10-12\text{H}_2\text{O}$
- Bassetite  $\text{Fe}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 8\text{H}_2\text{O}$
- Bergenville  $\text{Ba}(\text{UO}_2)_4(\text{PO}_4)_2(\text{OH})_4 \cdot 8\text{H}_2\text{O}$
- Brockite  $(\text{Ca}, \text{Th})\text{PO}_4 \cdot \text{H}_2\text{O}$
- Cerphosphorhuttonite  $(\text{Th}, \text{Ce})(\text{Si}, \text{P})\text{O}_4 \cdot 1.5\text{H}_2\text{O}$
- Cheralite  $(\text{Ca}, \text{Th}, \text{Ce})(\text{P}, \text{Si})\text{O}_4$
- Coconinoite  $\text{Fe}^{+3}_2\text{Al}_2(\text{UO}_2)_2(\text{PO}_4)_4(\text{SO}_4)(\text{OH})_2 \cdot 20\text{H}_2\text{O}$
- Dawsonite  $\text{Pb}_3(\text{UO}_2)_5(\text{PO}_4)_4(\text{OH})_4 \cdot 10\text{H}_2\text{O} (?)$
- Dumontite  $\text{Pb}_2(\text{UO}_2)_3(\text{PO}_4)_2(\text{OH})_4 \cdot 3\text{H}_2\text{O}$
- Fritzscheite  $\text{Mn}(\text{UO}_2)_2[(\text{P}, \text{V})\text{O}_4]_2 \cdot 8\text{H}_2\text{O} (?)$
- Grayite Thorium phosphate, perhaps  $(\text{Th}, \text{Pb}, \text{Ca})(\text{PO}_4) \cdot \text{H}_2\text{O}$
- Hydrogen autunite  $\text{H}_2(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 8-10\text{H}_2\text{O}$
- Kivulite  $(\text{Th}, \text{Ca}, \text{Pb})\text{H}_2(\text{UO}_2)_4(\text{PO}_4)_2(\text{OH})_8 \cdot 7\text{H}_2\text{O}$
- Lermontovite  $(\text{U}, \text{Ca}, \text{R.E.}^*)_3(\text{PO}_4)_4 \cdot 6\text{H}_2\text{O}$  \*RARE EARTHS
- Meta-ankoleite  $\text{K}_2(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 6\text{H}_2\text{O}$
- Meta-autunite I  $\text{Ca}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 2-6\text{H}_2\text{O}$
- Meta-autunite II  $\text{Ca}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 0-6\text{H}_2\text{O}$
- Metasaleeite  $\text{Mg}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 4(?)\text{H}_2\text{O}$
- Metatorbernite  $\text{Cu}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot n\text{H}_2\text{O}$ , where  $n=4 (?)$  to 8.
- Meta-uranocircite  $\text{Ba}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 8\text{H}_2\text{O}$
- Monazite  $(\text{Ce}, \text{La}, \text{Nd})\text{PO}_4$ , with Th substituting for (Ce, La).
- Natroautunite  $\text{Na}_2(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 8\text{H}_2\text{O}$
- Ningyolite  $(\text{U}, \text{Ca}, \text{R.E.}^*)_2(\text{PO}_4)_2 \cdot 1-2\text{H}_2\text{O}$  \*RARE EARTHS
- Parsonsite  $\text{Pb}_2(\text{UO}_2)(\text{PO}_4)_2$
- Phosphuranylite  $\text{Ca}(\text{UO}_2)_4(\text{PO}_4)_2(\text{OH})_4 \cdot 7\text{H}_2\text{O}$
- Przhevalskite  $\text{Pb}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 2\text{H}_2\text{O}$
- Pseudo-autunite  $(\text{H}_3\text{O})_2\text{Ca}(\text{UO}_2)(\text{PO}_4)_2 \cdot 2.5\text{H}_2\text{O}$
- Renardite  $\text{Pb}(\text{UO}_2)_4(\text{PO}_4)_2(\text{OH})_4 \cdot 7\text{H}_2\text{O}$
- Sabugalite  $\text{HAl}(\text{UO}_2)_4(\text{PO}_4)_4 \cdot 16\text{H}_2\text{O}$
- Saleeite  $\text{Mg}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 8-10\text{H}_2\text{O}$
- Saryarkite  $(\text{Ca}, \text{Y}, \text{Th})_2\text{Al}_4(\text{SiO}_4, \text{PO}_4)_4(\text{OH}) \cdot 9\text{H}_2\text{O}$
- Sodium uranospinitite  $(\text{Na}_2, \text{Ca})(\text{UO}_2)_2[(\text{As}, \text{P})\text{O}_4]_2 \cdot 5\text{H}_2\text{O}$
- Torbernite  $\text{Cu}(\text{UO}_2)_2(\text{PO}_4)_2 \cdot 12\text{H}_2\text{O}$
- Uramphite  $(\text{NH}_4)(\text{UO}_2)(\text{PO}_4) \cdot 3\text{H}_2\text{O}$

Uranospathite  $\text{Cu}(\text{UO}_2)_2(\text{AsO}_4, \text{PO}_4)_2 \cdot 11\text{H}_2\text{O} (?)$

Selenites:

Demesmaekerite  $\text{Pb}_2\text{Cu}_5(\text{UO}_2)_2(\text{SeO}_3)_6(\text{OH})_6 \cdot 2\text{H}_2\text{O}$

Guilleminite  $\text{Ba}(\text{UO}_2)_3(\text{OH})_4(\text{SeO}_3)_2 \cdot 3\text{H}_2\text{O}$

Silicates:

Barium uranophane Contains major Ba, U, Si.

Beta-uranophane  $\text{Ca}(\text{UO}_2)_2(\text{SiO}_3)_2(\text{OH})_2 \cdot 5\text{H}_2\text{O}$

Billbinitite  $3(\text{Ca}, \text{Pb})\text{O} \cdot (\text{U}, \text{Th})\text{O}_2 \cdot 7\text{UO}_3 \cdot 10\text{SiO}_2 \cdot 19\text{H}_2\text{O}$

Boltwoodite  $\text{K}_2(\text{UO}_2)_2(\text{SiO}_3)_2(\text{OH})_2 \cdot 5\text{H}_2\text{O}$

Caryocerite Borosilicate of Ce, Y, and Th.

Cerphosphorhuttonite  $(\text{Th}, \text{Ce})(\text{Si}, \text{P})\text{O}_4 \cdot 1.5\text{H}_2\text{O}$

Cheralite  $(\text{Ca}, \text{Th}, \text{Ce})(\text{P}, \text{Si})\text{O}_4$

Chevkinite  $(\text{Ce}, \text{Y}, \text{Ca}, \text{U}, \text{Th})_2(\text{Ti}, \text{Fe}, \text{Mg})_2(\text{Si}, \text{Al})_2\text{O}_{11} (?)$

Coffinite  $\text{U}(\text{SiO}_4)_{1-x}(\text{OH})_{4x}$

Cuprosklodowskite  $\text{Cu}(\text{UO}_2)_2(\text{SiO}_3)_2(\text{OH})_2 \cdot 5\text{H}_2\text{O}$

Ekanite  $(\text{Th}, \text{U})(\text{Ca}, \text{Fe}, \text{Pb})_2\text{Si}_8\text{O}_{20}$

Halweelite  $\text{CaO} \cdot 2\text{UO}_3 \cdot 6\text{SiO}_2 \cdot 5\text{H}_2\text{O}$

Huttonite  $\text{ThSiO}_4$

Hydrocerite  $(\text{La}, \text{Ce}, \text{Th})_2(\text{Si}, \text{P})_2\text{O}_7 \cdot 5\text{H}_2\text{O}$

Kasolite  $\text{Pb}(\text{UO}_2)(\text{SiO}_3)(\text{OH})_2$

Metahalweelite  $\text{CaO} \cdot 2\text{UO}_3 \cdot 6\text{SiO}_2 \cdot n\text{H}_2\text{O}$

Nenadkevite  $(\text{U}^{+4}, \text{Y}, \text{Ce})\text{U}^{+6}(\text{Ca}, \text{Mg}, \text{Pb})(\text{SiO}_4)_2(\text{OH})_4 \cdot n\text{H}_2\text{O}$

Orillite  $3\text{PbO} \cdot 3\text{UO}_3 \cdot 4\text{SiO}_2 \cdot 6\text{H}_2\text{O}$

Orthochevkinite Dimorph of chevkinite.

Perrierite  $(\text{Ce}, \text{Y}, \text{Ca}, \text{Th})_2(\text{Ti}, \text{Fe}, \text{Mg})_2(\text{Si}, \text{Al})_2\text{O}_{11} (?)$

Ranquillite  $3\text{CaO} \cdot 4\text{UO}_3 \cdot 10\text{SiO}_2 \cdot 24\text{H}_2\text{O}$

Saryarkite  $(\text{Ca}, \text{Y}, \text{Th})_2\text{Al}_4(\text{SiO}_4, \text{PO}_4)_4(\text{OH}) \cdot 9\text{H}_2\text{O}$

Sklodowskite  $\text{Mg}(\text{UO}_2)_2(\text{SiO}_3)_2(\text{OH})_2 \cdot 5\text{H}_2\text{O}$

Sodylite  $(\text{UO}_2)_5(\text{SiO}_4)_2(\text{OH})_2 \cdot 5\text{H}_2\text{O}$

Steenstrupine  $(\text{Ce}, \text{La}, \text{Th}, \text{Ca}, \text{Na})_2(\text{Mn}, \text{Fe})(\text{SiO}_3)_2(\text{OH})_2 \cdot 2\text{H}_2\text{O}$

Thorite  $\text{ThSiO}_4$

Thorogummite  $(\text{Th}(\text{SiO}_4)_{1-x}(\text{OH})_{4x})$

Thorosteenstrupine  $(\text{Ca}, \text{Th}, \text{Mn})_3\text{Si}_4(\text{O}, \text{F})_{12} \cdot 5.7\text{H}_2\text{O}$

Tritomite Borosilicate of Ce, Y, Th, Ca, and F.

Uranophane  $\text{Ca}(\text{UO}_2)_2(\text{SiO}_3)_2(\text{OH})_2 \cdot 5\text{H}_2\text{O}$

Ursilite  $2(\text{Ca}, \text{Mg})\text{O} \cdot 2\text{UO}_3 \cdot 5\text{SiO}_2 \cdot 9-10\text{H}_2\text{O}$

Usgite  $\text{R}(\text{UO}_2)_2(\text{Si}_2\text{O}_7) \cdot n\text{H}_2\text{O}$  MEANING OF R NOT SPECIFIED

Weeksite  $\text{K}(\text{UO}_2)_2(\text{Si}_2\text{O}_5)_3 \cdot 4\text{H}_2\text{O}$

Yttrialite  $(\text{Y}, \text{Th})_2\text{Si}_2\text{O}_7$

#### Sulfates:

Calclouraconite Near  $\text{Ca}(\text{UO}_2)_4(\text{SO}_4)_2(\text{OH})_6 \cdot 20\text{H}_2\text{O}$

Coconinolt  $\text{Fe}_2^{+3}\text{Al}_2(\text{UO}_2)_2(\text{PO}_4)_4(\text{SO}_4)(\text{OH})_2 \cdot 20\text{H}_2\text{O}$

Cuprozippeite  $\text{Cu}(\text{UO}_2)_2(\text{SO}_4)_2(\text{OH})_2 \cdot 11\text{H}_2\text{O}$

Johannite  $\text{Cu}(\text{UO}_2)_2(\text{SO}_4)_2(\text{OH})_2 \cdot 6\text{H}_2\text{O}$

Medjildite Supposedly a uranium sulfate.

Meta-uranopilite  $(\text{UO}_2)_6(\text{SO}_4)(\text{OH})_{10} \cdot 5\text{H}_2\text{O}(?)$

Schroekingite  $\text{NaCa}_3(\text{UO}_2)(\text{CO}_3)_3(\text{SO}_4)\text{F} \cdot 10\text{H}_2\text{O}$

Uranochalcite Supposedly a uranium sulfate.

Uranopilite  $(\text{UO}_2)_6(\text{SO}_4)(\text{OH})_{10} \cdot 12\text{H}_2\text{O}$

Voglianite Hydrus calcium uranium sulfate.

Zippeite  $\text{K}_4(\text{UO}_2)_6(\text{SO}_4)_3(\text{OH})_{10} \cdot \text{H}_2\text{O}$

#### Tellurites:

Moctezumite  $\text{PbO} \cdot \text{UO}_3 \cdot 2\text{TeO}_2$

#### Vanadates:

Carnotite  $\text{K}_2(\text{UO}_2)_2(\text{VO}_4)_2 \cdot n\text{H}_2\text{O}(n=1 \text{ to } 3)$

Ferghanite  $(\text{UO}_2)_3(\text{VO}_4)_2 \cdot 6\text{H}_2\text{O}(?)$

Francevillite  $(\text{Ba}, \text{Pb})(\text{UO}_2)_2(\text{VO}_4)_2 \cdot 5\text{H}_2\text{O}$

Fritzscheite  $\text{Mn}(\text{UO}_2)_2[(\text{P}, \text{V})\text{O}_4]_2 \cdot 8\text{H}_2\text{O}(?)$

Metatyuyamunite  $\text{Ca}(\text{UO}_2)_2(\text{VO}_4)_2 \cdot 3-5\text{H}_2\text{O}$

Rauvite  $\text{CaO} \cdot 2\text{UO}_3 \cdot 5\text{V}_2\text{O}_5 \cdot 16\text{H}_2\text{O}(?)$

Senglerite  $\text{Cu}(\text{UO}_2)_2(\text{VO}_4)_2 \cdot 8-10\text{H}_2\text{O}$

Tyuyamunite  $\text{Ca}(\text{UO}_2)_2(\text{VO}_4)_2 \cdot 5-8\text{H}_2\text{O}$

Uvanite  $\text{U}_2\text{V}_6\text{O}_{21} \cdot 15\text{H}_2\text{O}(?)$

Vanuralite  $(\text{UO}_2)_2\text{Al}(\text{VO}_4)_2(\text{OH}) \cdot 8\text{H}_2\text{O}$

Vanuranylite  $[(\text{H}_3\text{O})_{1.2}(\text{Ba}, \text{Ca}, \text{K}, \text{Pb})_{0.4}](\text{UO}_2)_2(\text{VO}_4)_2 \cdot 4 \cdot 2\text{H}_2\text{O}$

Base from U. S. Geological Survey

EXPLANATION

- HOST ROCKS FOR OCCURRENCES**
- SANDSTONE, ARKOSE, CONGLOMERATE, SILTSTONE, LAKE SEDIMENTS
  - COAL, SHALE, LIMESTONE
  - SPRING DEPOSITS, GROUND WATER
  - △ IGNEOUS, METAMORPHIC
  - ◇ UNDETERMINED
  - 11 OCCURRENCE NUMBER FROM TEXT
- STATE BOUNDARY
- COUNTY BOUNDARY

**RADIOACTIVE MINERAL OCCURRENCES OF THE GREELEY 1°x2° QUADRANGLE, COLORADO**

Compiled by James L. Nelson-Moore, Donna Bishop Collins, and A. L. Hornbaker

1978
