

COLORADO GEOLOGICAL SURVEY
Open-file Report OF-23-09
Geologic Map of the Montezuma Quadrangle, Summit, Clear Creek, and
Park Counties, Colorado

FILE CONTENTS

Inside the folder labeled **OF-23-09**, there are a number of files and folders. Some files are in Adobe Portable Document (.pdf) format. Geographic Information Systems (GIS) data are also included. These data are in ESRI's ArcGIS Pro map file format (.mapx) and geodatabase (.gdb) format along with [USGS Geologic Map Schema Standard \(GeMS\)](#) validation files (.html, .xml, and .txt).

REPORT DOCUMENTS

- **OF-23-09_Read_Me.pdf**
This file
- **OF-23-09_Montezuma_Plate_1_Geologic map.pdf**
Includes geologic map and list of map units
- **OF-23-09_Montezuma_Plate_2_xsection correlation oblique.pdf**
Includes correlation of map units, geologic cross section, geologic history and (or) setting, geochronology data, and 3D oblique view of geologic map
- **OF-23-09_GIS_Data folder**
Contains geodatabase and ArcGIS Pro map files, along with GeMS validation and metadata files

HOW TO IDENTIFY AND READ FILES

To view .pdf files

If you don't already have Adobe Reader installed on your device, visit <https://get.adobe.com/reader/> to download a free version of the software. Then, start Adobe Reader and choose "File," "Open," and locate the .pdf files where you downloaded them, they will open in Adobe Reader. You can also view .pdf files in Microsoft Edge.

To view GIS files

Geographic Information Systems files may be viewed using GIS software packages such as ESRI's ArcGIS platform. Included are geodatabases and layer files of the geologic elements. Within ArcGIS, it may be necessary to reset the "data source" on files to ensure proper viewing. Metadata is associated with geodatabase files and map files and is best viewed using the Metadata feature in ArcGIS Pro.

Alternatively, these geodatabase files may be viewed using QGIS, a free and open-source GIS software package, available for download at <https://download.qgis.org/>.

The GIS package follows **GeMS** database design. More information about this critical information resource and the standards it incorporates may be found on the [USGS National Geologic Map Database \(NGMDB\)](#) site.
