

Colorado Water Quality Database  
From the EPA STORET Database

This database was constructed using version 97 of Microsoft Access.

The explanation for the database structure is written in version 97 of Microsoft Word. For the purpose of allowing user to read the explanation in other word processing programs, we have also included the explanation in version 6.0/95 of Microsoft Word. This allows a program such as WordPad to view the document.

To view the data, download and un-zip the zipped data file and launch MS Access. Change directories to the un-zipped file location and open the database.

Any technical questions regarding MS Access should be directed to Microsoft technical support.
