Showing the proved Oil Fields, Oil Shale Deposits, location of Anticlinal Structures, Oil and Gas Seepages — and other indications of Oil and Gas.

NOTE: This map is not intended as an accurate or complete presentation of the oil and gas possibilities of the State of Colorado but merely to bring together and direct attention to some facts which may aid in the development of these resources. Many indications of both oil and gas are reported which, for lack of definite information are not recorded on the present map, and perhaps some as shown hereon are inaccurate.
