

EXPLANATION

PREDOMINANT AGE OF PRODUCTION

- TERTIARY
- UPPER CRETACEOUS
- LOWER CRETACEOUS
- JURASSIC-TRIASSIC
- PERMIAN-PENNSYLVANIAN
- MISSISSIPPIAN

Note: Where a field produces from formations of different ages, the age of predominant or current production is depicted, based on cumulative production. In the production, the 10-year average cumulative production is used. Lower Cretaceous as the production from age formations on the Colorado, Gunnison, etc. can be designated.

PIPELINES, REFINERIES AND PLANTS

- Continental
- Phillips
- Refinery
- Gas Processing Plant

Note: Major pipelines will include operator name, size and direction of flow. Refinery and gas processing plant locations are approximate. Showing capacity in million cubic feet daily.

FIELDS

- Oil Field
- Gas Field

Note: Field Discoveries through December 1982. Field names and producing horizons color-coded by oil (green) or gas (blue) production. Red color-coded by age of production. Field boundaries are approximate and do not distinguish between different producing horizons.

FIELD DESIGNATIONS

- (A) Abandoned Field
- (G) Gas Injection
- (D) Water Disposal
- (W) Water Flood
- (S) Gas Storage
- (W) Well(s)

UNDIFFERENTIATED PRECAMBRIAN ROCKS EXPOSED AT SURFACE
