

SURFICIAL DEPOSITS

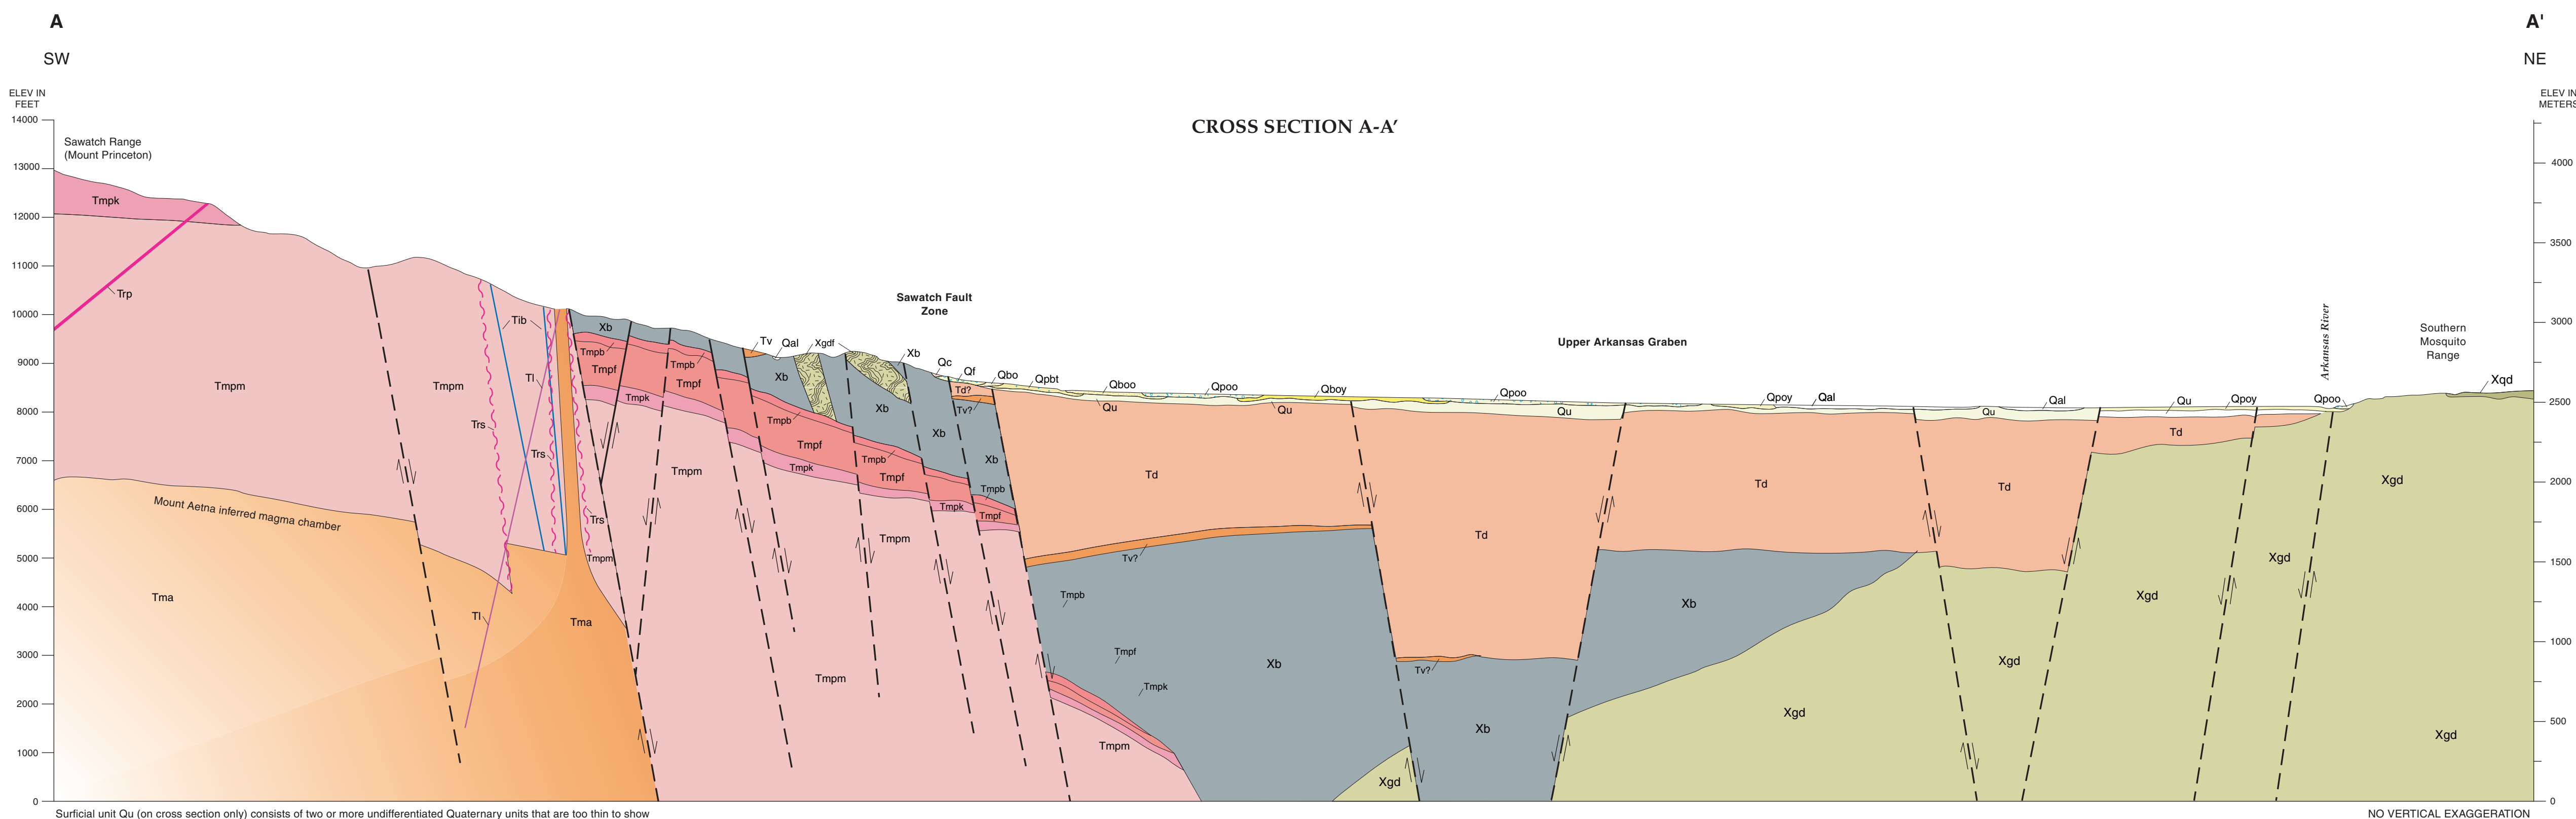

A 3D perspective view of a geological map. The map is rendered with various colors to represent different geological formations: red for the highest peaks, yellow for the surrounding slopes, and grey and brown for the lower, flatter areas. A river system is shown flowing through the landscape, with a large reservoir or lake in the lower right. The map is tilted, giving it a three-dimensional appearance.

Vertical Scale Exaggeration 1.5:1
