CASTLE ROCK $1/2^{\circ}$ X 1° QUADRANGLE Plate 1	

INTRODUCTION

The Colorado Geological Survey, under a United States Geological Survey grant, conducted a program involving the geophysical logging of water wells in the Castle Rock $1/2^{\circ} \times 1^{\circ}$ Quadrangle in November, 1981. The program was designed to aid in the evaluation of the coal resources of the quadrangle. The Colorado Geological Survey awarded the pump pulling contract to Don Eastwood Drilling, Inc., of Deer Trail, Colorado and the geophysical logging contract to Goodwell Inc. of Upton, Wyoming.

Locations of water wells which were logged in the program were determined after an extensive evaluation of petroleum exploration well logs, water well logs and logs of coal and uranium exploration holes. The final wells were selected based upon owner approval. The wells were located primarily in two different areas; the Buick-Matheson area, in which Laramie Formation coals are relatively near the surface and the Ramah-Fondis area, where coals of the Denver Formation are generally at shallow depths. One well near the western edge of the Denver Basin was logged; the remainder are on the eastern side. Well depths averaged about 400'. High costs precluded obtaining extensive information on extremely deep coals (over 500' depth).

Thirty-one wells had their pumps pulled and were geophysically logged. The standard logs run were natural gamma-density and natural gamma-neutron in wells cased with steel and natural gamma-density only in wells with plastic casing (PVC). Six wells had plastic casing.

Formation boundaries and coal beds in these wells were delineated primarily by interpretation of the geophysical logs, with backup information from the drillers' log for the well and other existing drill hole information in the proximity of the well.

Unless otherwise noted all measurements are in feet.

WATER WELL LOG, CASTLE ROCK 1/2° X 1° QUADRANGLE

Well No. 36 State-Colorado County- Elbert Date Logged- 11/4/81
 Location: T. 7 S., R. 62 W., sec. SENE 1 Elevation (ft) 5720
 Total depth 371 Logged depth 371 Fluid level 121

Geophysical logs:

Gamma (I):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Density:	TC	2	Scale	200 cps/in	Logging speed	20	fpm
Gamma (II):	TC		Scale	cps/in	Logging speed		fpm
Neutron:	TC		Scale	cps/in	Logging speed		fpm

Casing Information: 4½" PVC.

Remarks: Kiowa NE Quadrangle. No neutron log run due to plastic casing.

WATER WELL LOG, CASTLE ROCK 1/2° X 1° QUADRANGLE

Well No. 39 State-Colorado County- Elbert Date Logged-11/13/81
 Location: T. 10 S., R. 59 W., sec. NENE 6 Elevation (ft) 5940
 Total depth 534 Logged depth 534 Fluid level 220

Geophysical logs:

Gamma (I):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Density:	TC	2	Scale	200 cps/in	Logging speed	20	fpm
Gamma (II):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Neutron:	TC	2	Scale	200 cps/in	Logging speed	20	fpm

Casing Information: 0-302 4½" steel (perforated 242-302).

Remarks: Simla Quadrangle

WATER WELL LOG, CASTLE ROCK 1/2° X 1° QUADRANGLE

Well No. 40 State-Colorado County- Elbert Date Logged-11/17/81
 Location: T. 10 S., R. 60 W., sec. NENW 35 Elevation (ft) 6000
 Total depth 580 Logged depth 512 Fluid level 185

Geophysical logs:

Gamma (I):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Density:	TC	2	Scale	200 cps/in	Logging speed	20	fpm
Gamma (II):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Neutron:	TC	2	Scale	200 cps/in	Logging speed	20	fpm

Casing Information: 0-184 6" steel; 184-512 4½" steel.

Remarks: Simla Quadrangle

WATER WELL LOG, CASTLE ROCK 1/2° X 1° QUADRANGLE

Well No. 42 State-Colorado County- Elbert Date Logged- 11/19/81
 Location: T. 8 S., R. 59 W., sec. SWSW 12 Elevation (ft) 5653
 Total depth 212 Logged depth 204 Fluid level 125

Geophysical logs:

Gamma (I):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Density:	TC	2	Scale	200 cps/in	Logging speed	20	fpm
Gamma (II):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Neutron:	TC	2	Scale	200 cps/in	Logging speed	20	fpm

Casing Information: N/A

Remarks: Beuck Draw Quadrangle

WATER WELL LOG, CASTLE ROCK 1/2° X 1° QUADRANGLE

Well No. 50 State-Colorado County- Elbert Date Logged- 11/14/81
 Location: T. 8 S., R. 61 W., sec. SWSE 4 Elevation (ft) 5930
 Total depth 500 Logged depth 490 Fluid level 160

Geophysical logs:

Gamma (I):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Density:	TC	2	Scale	200 cps/in	Logging speed	20	fpm
Gamma (II):	TC	2	Scale	10 cps/in	Logging speed	20	fpm
Neutron:	TC	2	Scale	200 cps/in	Logging speed	20	fpm

Casing Information: N/A

Remarks: Bijou Quadrangle
